Associate Professor/Professor for the Division of Infectious Diseases

The Infectious Diseases Division of the Department of Medicine and the Havey Institute for Global Health at Northwestern University Feinberg School of Medicine are seeking a highly skilled, experienced physician and/or biological research scientist to fill a key leadership position in Emerging Infectious Diseases, defined specifically as newly emerging or re-emerging infectious diseases. This individual will play a pivotal role in expanding our research mission. The candidate would be expected to conduct research, teach infectious diseases fellows/trainees, and mentor junior faculty. The candidate must have an established track record that includes: successful National Institutes for Health (NIH), National Science Foundation or other government/foundation funding; peer-reviewed papers in high impact journals; global expertise; and leadership experience. Domestic and international candidates will be considered. Candidates will be considered with research interests including disease emergence, prevention, elimination, diagnosis and treatment.

The Infectious Diseases Division consists of 38 faculty members with a research portfolio focusing on: HIV, emerging and re-emerging pathogens, coronavirus-19, antimicrobial drug resistance, transplant infectious diseases and dengue. The division participates in the NIH- and CDC-funded Center for AIDS Research, AIDS Clinical Trials Group, Multicenter AIDS Cohort Study, the HIV Outpatient Study, Women’s Interagency HIV Study, and Solid Organ Transplantation in HIV Multi-Site Study. The Division receives over $10 million per year in NIH funding.

The Havey Institute for Global Health consists of 400 members from 9 centers including: Communicable and Emerging Infectious Diseases, Cancer, Cardiovascular Disease, Pathogen Genomics & Microbial Evolution, Primary Care, Education, Surgery, Health Policy, and Innovation in Global Health Technologies; it also has a Program in Global Neurology. The Havey Institute for Global Health has a $55 million research portfolio focused on the following areas: covid-19 diagnostic development, HIV-associated malignancies, HIV neurology, HIV outcomes, implementation research, sentinel surveillance of emerging pathogens, malaria, and cardiovascular outcomes.

The start date is negotiable, and the position will remain open until filled. Interested applicants should send a cover letter and C.V. directly to Professor Robert Murphy, Executive Director, Havey Institute for Global Health, r-murphy@northwestern.edu.
Northwestern University is an Equal Opportunity, Affirmative Action Employer of all protected classes, including veterans and individuals with disabilities. Women, racial and ethnic minorities, individuals with disabilities, and veterans are encouraged to apply. Hiring is contingent upon eligibility to work in the United States.
