

Global Health Clinical Scholars 2023 Scholarly Projects

Participants in the Global Health Clinical Scholars Program are expected to identify and complete a scholarly project as part of their program requirements. The scholarly project provides trainees with the ability to explore a global health topic in-depth, via a mentoring experience. Trainees then present their projects at Northwestern's annual Global Health Education Day, held each spring. Examples of Scholarly Projects completed in PY 2022-2023 can be found below.

Name	Program	Title of Scholarly Project	Type of Project
Giedd, Alexandra	Family Medicine	Impact of Medication Assisted Pregnancy Termination (MAPT) Training on Resident Confidence, Clinical Knowledge, and Intent to Provide Abortion Care	Curriculum Development
Yan, Amy	Anesthesia	Pencil-Point vs. Cutting Spinal Needles: A Cost Analysis	Original Research
Jones, Cameron	Emergency Medicine	Global Health Education and the Covid-19 Pandemic: Insights from Emergency Medicine Trainees and Partners	Original Research (Qualitative)
Kugel, Emily	Pediatrics	Development and Implementation of a Novel Pediatric Cardiac Urgencies Curriculum for Pediatric Trainees in Tanzania	Curriculum Development
Ekpe, Etoroabasi	OB/GYN	A Scoping Review of Implementation Studies on Antepartum Preterm Birth Interventions	Literature Review
Dawood, Gigi	Clinical Informatics	Diabetes in Bangladesh: review of the WHO/Bangladesh Ministry of health, 2013 national diabetes guidelines to establish a framework for standardized, diabetes care among Medglobal's medical care of Rohingya refugees	Literature Review
St. Cyr, Grace	Pediatrics	Examining the Role of Western vs. Non-Western Aid Workers on Refugee Health and Wellbeing: a Case Study from Greece	Case Report
Siddiqui, Saad	Family Medicine	Nature Rx: Exploring nature as medicine in Humboldt Park to develop a sustainable patient centered outcome program at an FQHC	Program Development
