

## Global Health Clinical Scholars 2024 Scholarly Projects

Participants in the Global Health Clinical Scholars Program are expected to identify and complete a scholarly project as part of their program requirements. The scholarly project provides trainees with the ability to explore a global health topic in-depth, via a mentoring experience. Trainees then present their projects at Northwestern's annual Global Health Education Day, held each spring. Examples of Scholarly Projects completed in PY 2023-2024 can be found below.

Name	Program	Title of Scholarly Project	Type of Project
Driscoll, Conor	Urology	Quantifying the Urologic Disease Burden in the Federated States of Micronesia (FSM)	Original Research (Qualitative)
Austermuehle, Ali	Pediatrics	Piloting a Critical Care Curriculum in Mwanza, TA	Curriculum Development
Figueroa, Ariel	Surgery	Smile Train: Barriers to Cleft Care Before, During, and After COVID19	Original Research
Ghandour, Dina	Neurology	Three-Year Experience at a Free Neurology Clinic Serving a Migrant Population	Original Research (Qualitative)
Marone, Jessica	PM&R	Charting Rehabilitation Outcomes for Patients Engaging in Medical Tourism: A Retrospective Cohort Study	Original Research
