

## Global Health Clinical Scholars 2020 Scholarly Projects

Participants in the Global Health Clinical Scholars Program are expected to identify and complete a scholarly project as part of their program requirements. The scholarly project provides trainees with the ability to explore a global health topic in-depth, via a mentoring experience. Trainees then present their projects at Northwestern's annual Global Health Education Day, held each spring. Examples of Scholarly Projects completed in 2020 can be found below.

Name	Program	Title of Scholarly Project	Type of Project
Adrissi, Jennifer	Neurology	A Case of JC Virus Granule Cell Neuronopathy in an HIV+ Patient Presenting with Severe Ataxia	Case Report
Anugerah, Ariana	Anesthesia	Role of POCUS in Pulmonary Hypertension	Case Report
Campbell, Charlotte	Internal Medicine	Asylum Clinics: Establishing a Legal, Medical, and Ethical Framework for the Global Healthcare Practitioner's Role	Program Development
Chun, Angela	Pediatrics	I-PACK (Immigrant Partnerships and Advocacy Curricular Kit) Education Modules: Advocacy in Action	Curriculum Development
Feister, John	Pediatrics	Development of a Simulation of Neonatal Respiratory Distress Syndrome for a Resource Limited Setting	Curriculum Development
Frisby-Zedan, Jeanne	Pediatrics	Influences of an Interdisciplinary Global Health Program on Cultural Awareness and Future Global Health Involvement: A Pilot Study	Original Research (Qualitative)
Nettey, Rotimi	Urology	Prevalence of Prostate Cancer at Autopsy in Nigeria – Preliminary Results	Original Research
Weber, Jonathon	Radiology	Improving Pediatric Access to Ultrasound in a Tertiary Care Hospital in Malawi	Program Development/Curriculum Development
