The Center for Global Health within the Feinberg School of Medicine invites you to complete the following evaluation regarding your recent global health experience. Your response will help the center to improve its programs, maintain relationships with international partners, and assist us when advising future students. The responses and data collected may be shared internally within Northwestern University and for those students who receive funding via the Global Health Initiative responses are also shared with the donor. A question on the survey asks respondents for permission to share the collected information with other FSM students and any external parties.

The survey will take approximately 10-15 minutes to complete and it is required that all medical students complete it upon returning to FSM.

For questions or comments please contact the Center for Global Health at: globalhealthcenter@northwestern.edu
